# **Growth is Good**

### **Summary and Recommendation**

We are happy to see the strong performance of global stock markets. We might be happier if oil and gas stocks had been participating more, but that is changing lately. Moreover, we can be patient recalling that oil and gas stocks made their highs a year after the broader stock market in 2008 and 2007. We attribute the stock market performance in no small part to U.S. government policy stimulus that is leading to less regulation, lower taxes and more economic growth. Growth is good for everyone, in our opinion.

#### **Economic Growth Contributes to Oil and Gas Demand**

Declining inventories of oil and natural gas signal demand rising faster than supply. U.S. crude oil inventories have dropped to the middle of the five-year range while U.S. natural gas in storage has dropped to the bottom end of the five-year range (see charts on page 2). Those trends were reflected in price increases this year of 7% for oil for next months delivery and 8% for natural gas. The price trends have further to go to reach our long-term expectations of \$70 a barrel for oil and \$4 a million btu for natural gas compared to \$64 and \$3.20 currently.

#### Oil and Gas Prices Drive Stock Prices

Year to date, the median stock price gain for the 22 stocks in our coverage was 6% compared to 4% for the U.S. Total Stock Market (see <u>Table 4</u> on page 6). **Sabine Royalty Trust (SBR)** and **Hess Corporation (HES)** were top gainers at 9% unlevered (9% and 15% levered, respectively). It is gratifying to see steep past decliners like **California Resources (CRC)** climbing back with levered gains of 13%. On a stock price momentum basis, all but three of our covered stocks are in a triple uptrend with price above the 50-day average, above the 200-day average and the 50-day is above the 200-day in the golden cross pattern. Among the three exceptions, **Dorchester Minerals (DMLP)** is close to triple positive just shy of the golden cross. **Range Resources (RRC)** may be bottoming as it has crossed to the positive side of the 50-day.

#### **Operating Performance Also Drives Stock Prices**

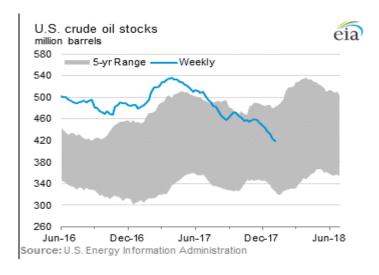

A median McDep Ratio of 0.90 implies 11% unlevered appreciation in 12 months (see <u>Table 1</u> on page 3). Higher volume or lower cost than in our base estimates could increase unlevered cash flow (Ebitda) and implied return (see <u>Table 2</u> on page 4). Changes beyond the range of error in our estimates would lead to a change in Net Present Value per share (see <u>Table 3</u> on page 5).

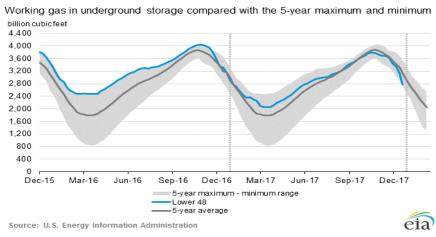

## San Juan Basin Illustrates Upside Beyond Current McDep Ratio

New owners with new ideas aim to developed trillions of cubic feet of untapped shale gas in one of our largest gas resources. Greatly elaborating on the history and future of the San Juan Basin,

Oil and Gas Investor published a 15-page cover story in its January issue. The article included interviews with the largest land owners, BP and Hilcorp as well as new independents. A brief mention of a familiar name caught our eye as it symbolizes change and opportunity. Bob Simpson, the CEO who sold XTO Energy to ExxonMobil (XOM) near the top of the market, is back in the San Juan Basin with a private equity partner near the bottom of natural gas price. Simpson was a colleague of Jon Brumley at Southland Royalty when that company spun off the San Juan Basin Royalty Trust (SJT) in 1980. Priced for today's cash flow, SJT is a pure play on the upside of an historic natural gas giant that may become one of our largest natural gas plays again.

Kurt H. Wulff, CFA

**Disclaimer:** This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

**Certification:** I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

**Research Methodology/Ratings Description:** McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value.
