

## \$70 Oil Here

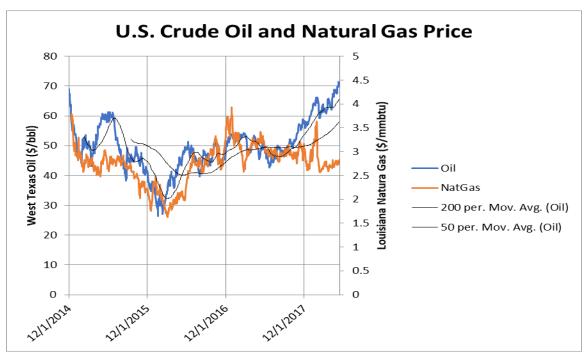

## **Summary and Recommendation**

Magically, the near-term oil price has nearly reached a sustainable US\$70 a barrel for the U.S. futures benchmark (WTI) (see chart <u>U.S. Crude Oil and Natural Gas Price</u> on page 2). \$70 is our long-term expectation of oil price for valuing McDep stocks. A McDep Ratio of 1.00 is the signal that stock price equals Net Present Value (NPV), which is the price corresponding to an unlevered real return of about 7% a year at \$70 oil. To illustrate the rationale, a free cash flow stream lasting indefinitely could be priced at a multiple of 14 times to correspond with 7% a year. Yet, our present value estimates are a median 8.8 times unlevered cash flow (PV/Ebitda). The difference could be explained largely by the fraction of cash flow that must be reinvested to sustain production. Meanwhile, the market implies an unlevered cash flow multiple (EV/Ebitda) of a median 7.7 times. Conveniently, the ratio of EV/Ebitda to PV/Ebitda is reduced to EV/PV, or Market Cap and Debt to Present Value, which suggest the name McDep Ratio. Currently at a median 0.85, the McDep Ratio conveys our conclusion that oil stocks are not yet priced for \$70 oil.

Oil price trends may be reflecting prospects for improving economic growth also reflected in nominal interest rate, expected inflation and rising real interest rate (see chart <u>U.S. Ten Year Interest Rate and Inflation</u> on page 2). Oil and gas stocks are likely to perform well in a diversified portfolio in an economic transition from low growth and inflation to moderate growth and inflation.

We like stocks in each of our five groups (see <u>Tables 1-4</u> on pages 3-6 and <u>Index of Recent Research</u> on page 7). **Suncor (SU)** leaps to the head of the pack in stock price performance among integrated companies amid an environmental civil war between Canadian provinces over oil transportation. **ExxonMobil (XOM)**, the largest stock, seems to be regaining favor with investors considering its 14% rebound from a surprisingly steep drop to a 52-week low about six weeks ago. Highest McDep Ratio **Occidental Petroleum (OXY)** pays an unmatched 3.6% dividend yield among independent producers. High-growth shale pioneer **Continental Resources (CLR)** is our only company with dominant ownership held by a founder CEO, a positive indicator of upside not captured in the McDep Ratio. High risk, high reward small cap producers illustrate the importance of perseverance or timing with the two oil concentrated stocks, **CRC** and **WLL**, up more than 80% in 2018. Finally, **Sabine Royalty Trust (SBR)**, at a PV/Ebitda multiple of 16 times illustrates the value accompanying paying out all its free cash flow on stable production with no obligation to reinvest.

**Disclaimer:** This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

**Certification:** I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value.
