Six-Year Futures in 2014 Oil Up, Natural Gas Up More

Summary and Recommendation

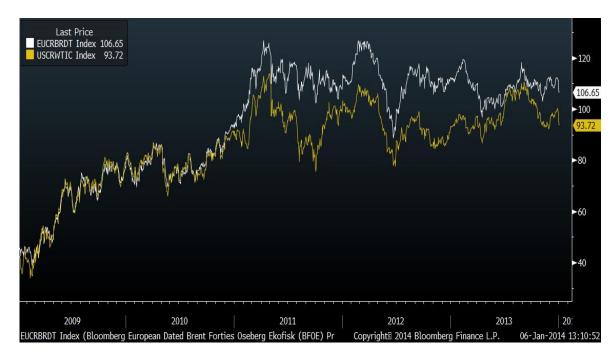

We call six-year futures of oil to increase to \$90 a barrel in 2014 from \$82 today and six-year futures for natural gas to approach \$6 a million Btu in 2014 from \$4.20 today (see chart Six-Year and One-Year Natural Gas and Oil Futures below). Buy-recommended U.S. fraccers like Range (RRC), Cimarex (XEC), Continental (CLR) and Whiting (WLL) are growing volume in a constructive price environment. Abnormal discounts support the price outlook. West Texas crude oil, the U.S. futures benchmark, is priced in the spot market some \$14 a barrel below Brent, the European benchmark (see chart Brent and WTI on page 2). Six-year natural gas is priced some 70% (20:1 price ratio) below the heating value of oil (6:1 price ratio – see chart Oil/Natural Gas Futures on page 2). Possibly pointing to higher prices ahead, natural gas in U.S. underground storage has declined to the extreme of the five-year range (see chart Working Gas on page 3). Another bullish factor for six-year futures, we think, is that one-year oil futures are priced above six-year futures (see chart Oil Futures on page 3). In the past few weeks, one-year natural gas futures have moved above six-year futures for the first time since before the peak in 2008 (see chart Natural Gas Futures on page 4). Contrary to our upbeat case, 40-week measures point to downward momentum (see chart Six-Year Commodity Price Meter on page 4). In any case, we believe the oil and gas producers in our coverage are creating value that is vital to a growing global economy and are likely to be rewarding long-term investments (see <u>Tables 1-4</u> on pages 5-8).

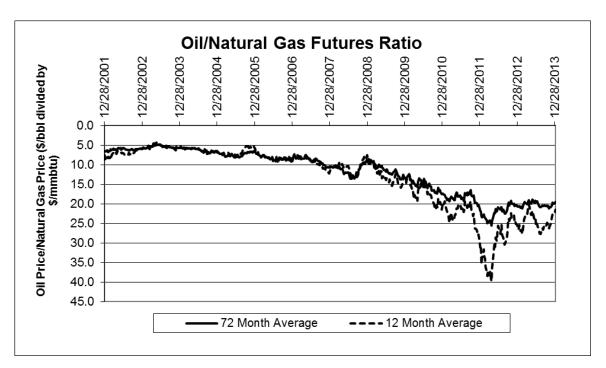

Kurt H. Wulff, CFA

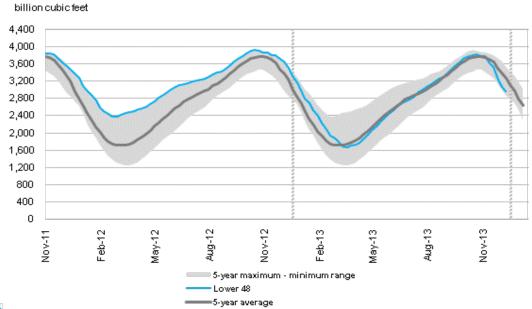

European Brent and West Texas Crude Oil

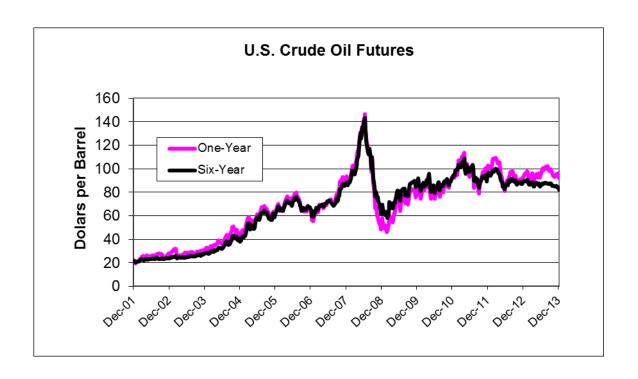

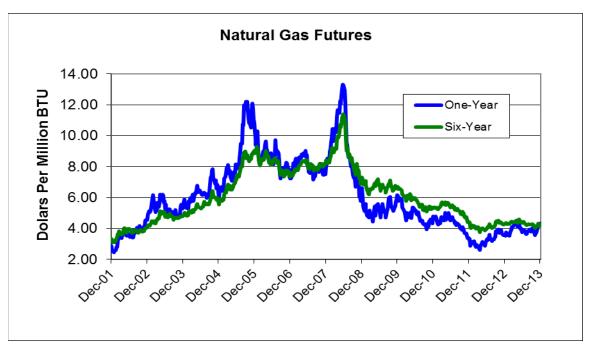

Working gas in underground storage compared with the 5-year maximum and minimum

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
