

Create Contrarian Buy (CB) Category

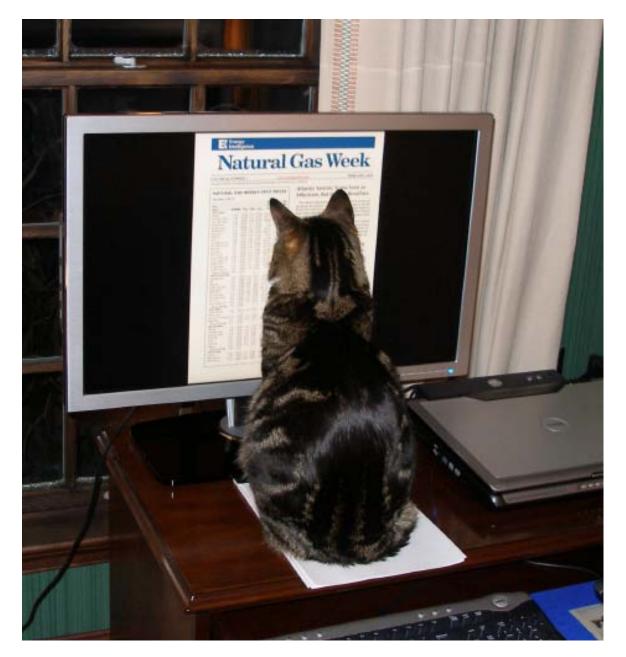

Summary and Recommendation

We initiate a new designation, "Contrarian Buy", for previous buy recommendations, **ExxonMobil (XOM)**, **Marathon Oil (MRO)**, **Woodside Petroleum (WOPEY)**, **Petrobras (PBR)**, and **Imperial Oil (IMO)** that trade below their respective 200-day average stock prices. We like the long-term prospects for the stocks, but can't rule out a continuing medium-term downtrend for a while. Yet, prices can change quickly, faster than we can change our ratings. Provided the downtrend doesn't persist, buying as a contrarian can be a rewarding strategy. Contrarian buys should be lower McDep Ratio stocks with the extra appreciation potential as the reward for more patience. Meanwhile, the trend in long-term oil price continues upward with the current quote of \$84 a barrel above the 40-week average of \$82 (see chart below, <u>Six-Year</u> <u>Commodity Price Meter</u> and on last page, <u>Six-Year and One-Year Natural Gas and Oil Futures</u>). Six-year natural gas is trendless with the current quote of \$6.50 compared to the 40-week average of \$6.70. One-year natural gas is in a rising trend indicated by a current quote of \$5.90 a million btu compared to the 40-week average of \$5.40.

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations are expected to deliver a total return less than inflation.
