

Oil Spill and BP Stock Spill

Summary and Recommendation

Down \$24 billion in market value in the past week, largely as a result of an oil spill in the Gulf of Mexico, and trading at a McDep Ratio of 0.66, the stock of **BP plc (BP)** has little further relative downside in a long-term context, we believe. As for reinstating our buy recommendation, we look for some time to pass for the stock to rebuild a new base before crossing to an uptrend above a lower 200-day average. Some of our buy recommendations including Devon Energy (DVN) at a McDep Ratio of 0.70 are as undervalued or nearly so as BP (see Tables 1-3). The timing of Devon's sale of deep water offshore prospects to BP seems eerily prescient, though no one could have anticipated the actual turn of events. The higher McDep Ratios of other buy recommendations might help long-term investors stick with BP shares currently held. While deep water assets may be impaired as a result of likely new government regulation, non-deep water energy assets all become more valuable in an outlook for delayed and more expensive deep water production. Possibly reflecting that economic likelihood in part, the average futures price for oil for the next six years advanced to \$96 a barrel compared to the 40-week average of \$86. Natural gas for the next six years at \$6.07 a million Btu is below the 40-week average of \$6.48 (see chart below, Six-Year Commodity Price Meter and on page 6, Six-Year and One-Year Natural Gas and Oil Futures).

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations are expected to deliver a total return less than inflation.
