Euro Oil Income Buys

Summary and Recommendation

Buy Euro Oils -- Total (TOT), Statoil (STO) and Royal Dutch Shell (RDS) -- for high dividend income ranging from an indicated 4.7% to 5.9% a year currently. From a median McDep Ratio near 0.7, the stocks may have total return potential comparable to the median 11% a year from eight years ago (see table below Euro Oil Income Buys – McDep Ratio 2010, 2002). We pick eight years for historical measurement because October 2002 was also a low point for stock market investments by the secular, four year and seasonal cycles. In a more generic sense, unlevered cash flow multiple (EV/Ebitda) is low at a median 4.7 times and debt is low at a median 0.20 ratio to present value (see Tables 1-4 on pages 2-5). RDS, the relative underperformer during the 2000s, has been setting new 52-week stock price highs recently under the leadership of its first non-Dutch, non-British chief executive, Mr. Peter Voser, a Swiss citizen. Each of the three stocks depends most on the price of crude oil, which is in a rising trend measured by the latest futures price for the next six years of \$88 a barrel tracking above the 40week average of \$86 (see chart Six-Year and One-Year Natural Gas and Oil Futures on page 7). The three stocks depend 19% to 40% on the price of natural gas, which is in a declining trend by the 40-week measure. With most of their production in Europe or Asia, the companies are less directly sensitive to the North American natural gas price, which has dropped below the September lows on a one-year and six-year basis. Financially strong, the companies can withstand and take advantage of exaggerated price fluctuations.

Kurt H. Wulff, CFA

A Weekly Analysis of Large Cap Oil and Gas Stocks October 26, 2010

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
