Sell in May? No Way

Summary and Recommendation

In addition to political, economic and environmental trends supporting long-term investment in oil and gas, we think there is a reasonable chance the near-term gains could be unusually strong. As a result, we do not counsel "Sell in May and Go Away" as the popular expression summarizes the historical seasonal pattern during which the stock market gains from May to November are slight compared to those from November to May. Instead we see a strong historical comparison to May 1979 when we wrote one of our better-timed buy recommendations A Change in Fundamentals – The Case for Major Upward Revaluation of Domestic Oils. The ten stocks gained an average 24% in price from May 1 to November 1 en route to further advances (see table U.S. Domestic Oils, 1979 below). The list reads like a page from oil and gas history. Each of the underlying companies was acquired, merged or restructured in subsequent years. Today our large cap buys are more global with integrated companies domiciled in Europe, Russia, China and Brazil as well as the U.S. (see <u>Tables 1-4</u> on pages 2-5). Another distinction today is the creation of new high-potential independent producers in the U.S. and Canada that have grown to large cap size. To build a new large cap portfolio, pick the lowest McDep Ratio buy in each group which would be Chevron (CVX), Total (TOT), Lukoil (LUKOY), Devon (DVN), and Canadian Oil Sands Ltd. (COSWF). Then choose other stocks to substitute or supplement, for example, to gain more natural gas exposure. Meanwhile, oil price, the most direct indicator of industry conditions, trends up with the latest quote for the next six years at \$107 a barrel compared to the 40-week average of \$93 (see table Six-Year and One-Year Natural Gas and Oil Futures on page 7).

Kurt H. Wulff, CFA

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
