Meter Reader A Weekly Analysis of Energy Stocks Using the McDep Ratio May 20, 2008

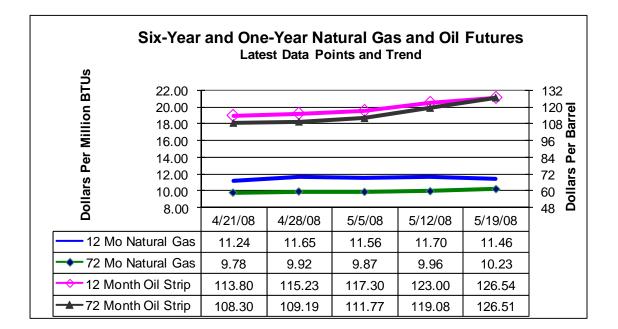

Scenario 1978-1980-1982

Summary and Recommendation

Buy recommendations of oil and gas producers like **Occidental Petroleum (OXY)** may have more potential for gain in the rest of 2008, but buy recommendations of producer/refiners like **ConocoPhillips (COP)** may have more potential to keep gains by the end of 2010. Looking back 28 years to a time when Phil Dodge and I collaborated on the coverage of oil and gas stocks at Donaldson, Lufkin and Jenrette, the hottest stars were oil and gas producers without accompanying oil refining and marketing operations. The median of 25 of those stocks increased in price to 3.8 times from the end of 1978 to the end of 1980 and held to 1.8 times at the end of 1982 (see table <u>Oil and Gas Stock Prices</u>). The median of 19 Producer/Refiner stocks increased to 2.3 times from the end of 1978 to the end of 1980 and held to 1.4 times at the end of 2006 while the median of 13 producer/refiners has reached 1.3. Offsetting factors that make the outlook better for 2010 than it proved to be for 1982 include a stronger outlook for global growth, lower interest rates and a more realistic acceptance of the limits of energy supply. Meanwhile the oil price trend is spreading more to future years as the quote for delivery over six years matches the quote for one-year (see chart <u>Six-Year and One-Year Natural Gas and Oil Futures</u>).

Kurt H. Wulff, CFA

A Weekly Analysis of Energy Stocks Using the McDep Ratio May 20, 2008

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC as of January 1, 2008. Previously Mr. Wulff was doing business as McDep Associates. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep does no investment banking business. McDep is not paid by covered companies including revenue from advertising, trading, consulting, subscriptions or research service. McDep shall not own more than 1% of outstanding stock in a covered company. No one at McDep is on the Board of Directors at a covered company nor is anyone at a covered company on the Board of Directors of McDep.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.

Please see disclosures on the final page.
