Buy ECA and COSWF among Canadian Producers

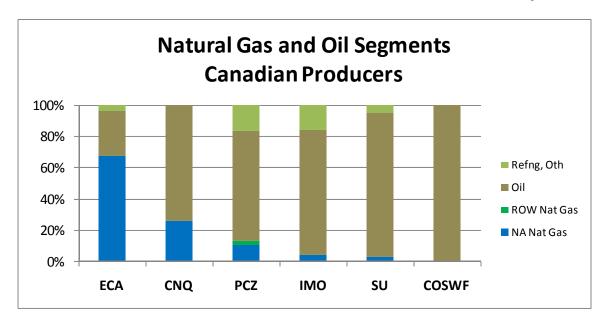

Summary and Recommendation

Canadian Producers offer attractive investment value, in our opinion, as stock prices are up from the lows after declining in anticipation of the depressed economic conditions now unfolding. We limit our number of buy recommendations until stock price breaks through the 200-day average to the upside or something surprising happens. Our two buy recommendations are the bookends to the ranking by McDep Ratio with Canadian Oil Sands Trust (COSWF) at the depressed left end and Encana (ECA) at the less depressed right end (see chart McDep Ratio). Resource-wise, COSWF ranks most concentrated on oil while ECA ranks most concentrated on natural gas (see chart Natural Gas and Oil Segments). Reflecting commodity price expectations as well as operating trends, the six Canadian producers traced a similar quarterly trend in estimated Net Present Value (see chart NPV). Accounting for all the value in COSWF, the Syncrude oil sands mine/upgrader accounts for an estimated 32% of the value in hold-rated Imperial Oil (IMO) and 19% in hold-rated Petro-Canada (PCZ). Hold-rated Suncor (SU) and hold-rated Canadian Natural Resources (CNO) have wholly-owned oil sands mines/upgraders. PCZ has the lowest unlevered market cash flow multiple (EV/Ebitda) at just 4 times and COSWF has the highest distribution yield at 5% estimated for the next twelve months (see Table 3). Valuation comparisons incorporate stock prices and futures prices as of January 16, the last normal global trading day before the Martin Luther King holiday (see chart on last page Six-Year and One-Year Natural Gas and Oil Futures). Canadian Producers make up one of six industry subsectors that might each be equally weighted in the McDep Energy Portfolio, we suggest.

Kurt H. Wulff, CFA

A Weekly Analysis of Large Cap Oil and Gas Stocks January 20, 2009

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep does no investment banking business. McDep is not paid by covered companies including revenue from advertising, trading, consulting, subscriptions or research service. McDep shall not own more than 1% of outstanding stock in a covered company. No one at McDep is on the Board of Directors at a covered company nor is anyone at a covered company on the Board of Directors of McDep.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
