# **New Oil Price Advance Started**

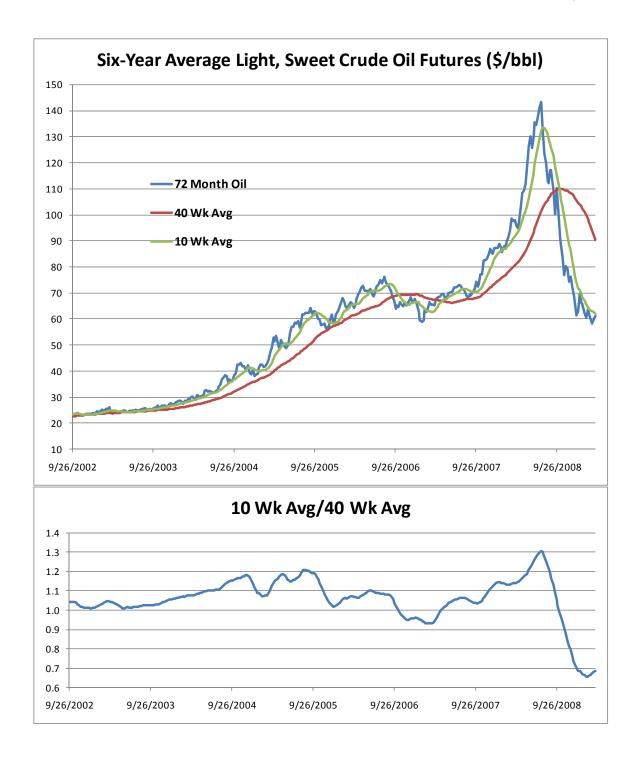

## **Summary and Recommendation**

Signs of a new uptrend in oil and gas prices may catalyze investor interest in ConocoPhillips (COP) and Devon Energy (DVN) among our most depressed buy recommendations. Average futures prices for the next six years for crude oil and natural gas appear to be in a new uptrend following the advance for the past five weeks in a leading indicator of price action at market extremes. To get a jump on when prices might turn, we borrowed some ideas from an analyst who studies price patterns (see the book, Technical Analysis of the Financial Markets by John J. Murphy). Using the six-year futures that we have calculated weekly for the past nine years since the inputs have been publicly available, we plot the ratio of a shorter 10-week moving average to the longer 40-week moving average we have cited frequently. The ratios bottomed and turned up five weeks ago for oil and for natural gas (see bottom panels on charts on page 2 and 3). Taking the cue, our weekly tally of oil futures followed in two weeks while natural gas may be following now (see upper panels page 2 and 3). COP and DVN might be especially helped in the event of positive follow-through because those stocks are the two among ten large cap buy recommendations that simultaneously rank practically lowest on McDep Ratio, Enterprise Value to 200-day average and Enterprise Value to 50-day average. Finally on COP, attending the company's analyst meeting last week and visiting with management, we are reinforced in our investment conclusion.

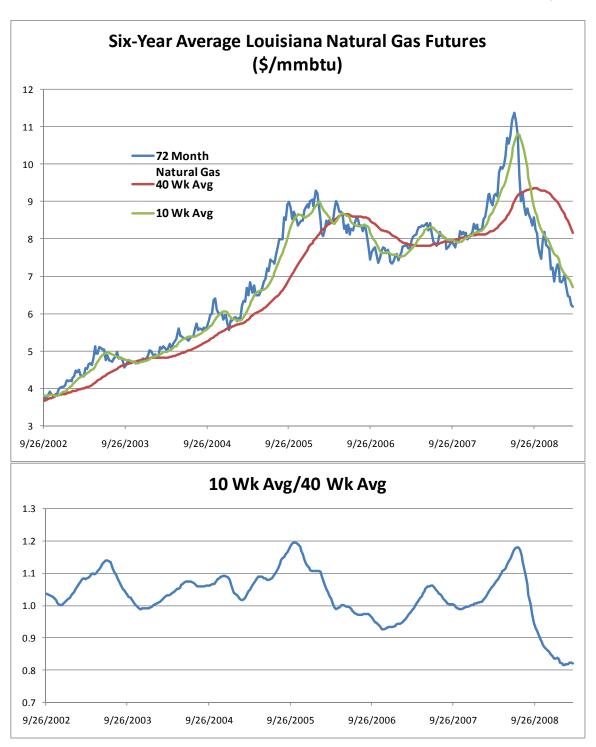

Kurt H. Wulff, CFA

**Disclaimer:** This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep does no investment banking business. McDep is not paid by covered companies including revenue from advertising, trading, consulting, subscriptions or research service. McDep shall not own more than 1% of outstanding stock in a covered company. No one at McDep is on the Board of Directors at a covered company nor is anyone at a covered company on the Board of Directors of McDep.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

**Certification:** I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
