Canada Deals

Summary and Recommendation

Despite a powerful uptrend in stock prices to March 23, there remain bargain deals for investors in low McDep Ratio, large cap, oil and gas stocks in Canada, including buy recommendations **Encana (ECA)** and **Canadian Oil Sands Trust (COSWF)**. Frustration over a recurring low stock price for hold-rated **Petro-Canada (PCZ)** has ended with an all stock takeover deal from hold-rated **Suncor (SU)**. On the first day of trading, the increase in market value of PCZ was matched by the decline in market value of Suncor after adjusting for generally positive price action for all stocks. It was a frequently asked question (FAQ) whether PCZ would ever be a takeover target because the Canadian government retains veto power over such a transaction. An FAQ on Encana concerns when, if ever, the natural gas market will come back. On oil sands the latest FAQ's stem from a disproportionate perspective on environmental issues. FAQ's could fade quickly with new perspective stimulated by commodity price action. It was a good week for oil price and for a turn in natural gas price (see chart below).

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep does no investment banking business. McDep is not paid by covered companies including revenue from advertising, trading, consulting, subscriptions or research service. McDep shall not own more than 1% of outstanding stock in a covered company. No one at McDep is on the Board of Directors at a covered company nor is anyone at a covered company on the Board of Directors of McDep.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
