## Lagging U.S. Integrated Oil Stocks

## **Summary and Recommendation**

Yet to sustain stock price above the 200-day average, buy recommendations ConocoPhillips (COP) and ExxonMobil (XOM) along with two peer stocks that make up our U.S. Integrated group have the potential to confirm a new stock price uptrend. In contrast, non-U.S. large cap oil and gas stock groups are in a stock price uptrend already for the most part. Largely because of stock price action, the median McDep Ratio for the U.S. Integrated Group is now the lowest of five large cap groups compared to three months ago when it was the highest (see Tables 1 and 2). One could be pessimistic and reckon that the threat of higher taxes is overhanging the U.S. stock market and U.S. oil and gas stocks. Yet, because oil tax increases contribute to oil price increases our political leaders are likely to moderate anti-oil industry action. Meanwhile, crude oil price also appears to be near keeping a level above its 200-day average. Late last week both the nearmonth and twelve months crude oil futures prices crossed the 200-day and 40-week average, respectively, perhaps ending the downtrend since September 2008 and possibly indicating a new uptrend. Presuming no unforeseen upset, six-year futures may also confirm a new uptrend soon (see chart on last page Six-Year and One-Year Natural Gas and Oil Futures and chart below, Six-Year Commodity Price Meter). As a result, commodity price may be in the process of confirming the new stock price uptrend traced by most of our large cap recommendations.

Kurt H. Wulff, CFA

A Weekly Analysis of Large Cap Oil and Gas Stocks May 26, 2009

**Disclaimer:** This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep does no investment banking business. McDep is not paid by covered companies including revenue from advertising, trading, consulting, subscriptions or research service. McDep shall not own more than 1% of outstanding stock in a covered company. No one at McDep is on the Board of Directors at a covered company nor is anyone at a covered company on the Board of Directors of McDep.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

**Certification:** I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
