Analysis of Oil & Gas Stocks August 2, 2013

Top Line Cash (DMLP, SBR, PBT, CRT, FRHLF) Advantaged Shale Investment

Summary and Recommendation

Buy-recommended **Dorchester Minerals, L.P. (DMLP)** and fellow RTF (Royalty Trust Fund) selections Sabine Royalty Trust (SBR), Permian Basin Royalty Trust (PBT), Cross Timbers Royalty Trust (CRT) and Freehold Royalties, Ltd. (FRHLF) offer rich cash participation in the North American oil and gas renaissance without being charged the high costs of horizontal drilling and fracking. Current cash distributions range in annual rate from 6.8 to 9.2% (see chart Quarterly Distribution on page 2). Growth in natural gas volume awaits gradual growth in demand as fracking has developed more supply than can be consumed currently (see chart Natural Gas on page 2). Growth in oil volume is occurring now, though there are infrastructure constraints acting temporarily (see chart Quarterly Oil Volume on page 3). Only in the past few months, oil growth has accelerated for PBT (see chart Monthly Oil Volume on page 3). Meanwhile, McDep Ratios range from 0.65 for CRT to 1.09 for Freehold (see Table ISC-1 on page 4). Remarkably, U.S. Top Line Cash Payers are debt-free while the Canadian stock, Freehold, has minimal debt (see Table ISC-2 on page 5). Life of reported reserves, ranging from 4.7 to 12.7 years, may be just a fraction of realistic assessment because operators provide little information on reserves to royalty owners (see Table ISC-3 on page 6). SBR receives all cash on a Top Line, or Revenue Royalty, basis while others receive a percentage from 98% to 69%. Only CRT has yet to join the other four Top Line stocks to trade above its 200-day average (see Table ISC-4 on page 7). Our official buy is DMLP and we recommend RTF stocks as a group.

Long-Life Heritage

DMLP and FRHLF own mineral rights in perpetuity dating from the beginning of industry and the early settlement of the continent. SBR, PBT and CRT own royalty rights that typically expire when production expires at some indefinite time, likely decades away.

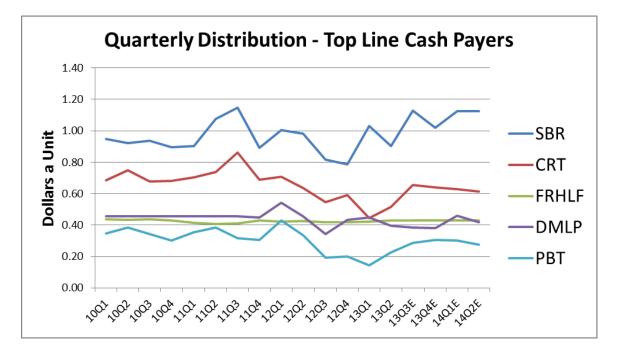

Shale Plays from Texas to North Dakota and Canada

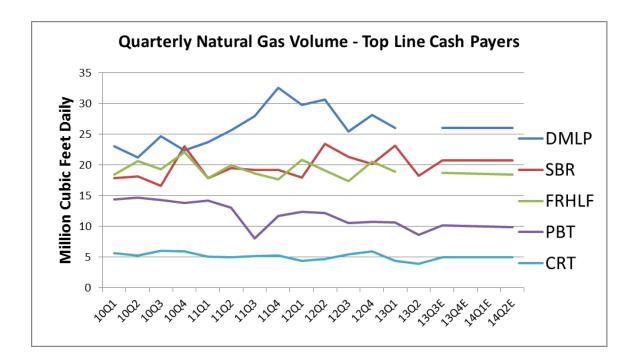

DMLP and SBR have important concentration on the Permian Basin of Texas, the area of exclusive concentration for PBT and minor concentration for CRT. As the largest historical oil source in North America, the Permian Basin may yet be the biggest in fracking of shale and tight rock. After Permian, North Dakota is the next most important current source of incremental cash for DMLP. Freehold has Canada covered from the Bakken to Pembina to Duvernay. CRT is mostly in the San Juan Basin of New Mexico where WPX Energy highlighted the first thousand barrel a day oil frack in its quarterly disclosures on August 1.

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the forty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
