

Oil & Gas Income Stocks

A Weekly Analysis November 14, 2008

Ten Percent in Three Hours

Summary and Recommendation

Remarkable value in stocks like buy-recommended **Canadian Oil Sands Trust (COSWF)** may be fleeting judging by a ten percent gain in the stock market averages in just the last three hours of regular trading in the U.S. on November 13. Of course, declines can be steep as well, but the cumulative decline in the past few months has been practically the steepest on record for energy stocks and now seasonal factors favor gains over declines in our opinion. In any event, the largest, most liquid, longest life, most rapidly growing income stock in our coverage has the lowest McDep Ratio, signaling the highest return potential. Declining the most relative to its 200-day average stock price, COSWF is also most concentrated on oil as opposed to natural gas and oil price is down more than natural gas price. For the group of income stocks, the median distribution yield is 11.1% for the next twelve months by our latest calculations. Estimates are made using closing quotes on November 13 for stock prices and settlement prices on November 10 for next twelve months deliveries of Light, Sweet Crude Oil at \$67.00 a barrel and Louisiana Natural Gas at \$7.50 a million btu.

Kurt H. Wulff, CFA

Oil & Gas Income Stocks

A Weekly Analysis November 14, 2008

Disclaimer: This analysis was prepared by Kurt Wulff, Manager of McDep LLC. The firm used sources and data believed to be reliable, but makes no representation as to their accuracy or completeness. This analysis is intended for informational purposes and is not a solicitation to buy or sell a security. Past performance is no guarantee of future results.

McDep does no investment banking business. McDep is not paid by covered companies including revenue from advertising, trading, consulting, subscriptions or research service. McDep shall not own more than 1% of outstanding stock in a covered company. No one at McDep is on the Board of Directors at a covered company nor is anyone at a covered company on the Board of Directors of McDep.

McDep or its employees may take positions in stocks the firm covers for research purposes. No trades in a subject stock shall be made within a week before or after a change in recommendation.

Certification: I, Kurt H. Wulff, certify that the views expressed in this research analysis accurately reflect my personal views about the subject securities and issuers. No part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research analysis.

Research Methodology/Ratings Description: McDep LLC is an independent research originator focused on oil and gas stocks exclusively. The firm applies the thirty years of experience of its analyst to estimate a present value of the oil and gas resources and other businesses of covered companies. That value is compared with a company's stock market capitalization and debt. Stocks with low market cap and debt relative to present value tend to outperform stocks with high market cap and debt relative to present value. Buy recommendations are expected to deliver a total return better than 7% per year above inflation. Hold recommendations assume the attributes of the underlying business are reflected in the current price of the stock. Sell recommendations are expected to deliver a total return less than inflation.
